

## **My Impressions about Latvia**

I am studying as an ERASMUS+ student in College of Law in Riga. When I started my university studies, I really wanted to go on ERASMUS+, but I was too scared to try it. After taking into consideration that ERASMUS+ would expand my career opportunities, my language development and my vision for the future, I finally decided to go on ERASMUS+ in the last year of the University. I chose Latvia because it is an ideal country for ERASMUS+ students. A quiet, peaceful, safe and cheap country and the transportation system is very advanced. Also, when I first came to Latvia, the first thing that caught my attention was that people respected nature. They protect nature and animals a lot. Riga is a city with lots of natural landmarks as well as places for social activities. There you can participate in many cultural events and meet new people.

Speaking of College of Law, our teachers and university staff are understanding, helpful and friendly. The teaching is very high quality. You are expected to do your own analysis on the assignments given. In this way, you receive training based on your own interpretation which is better than just memorizing facts. The school offers students all the facilities needed. It is right in the center of the city so it is quite comfortable for transportation. After school you can engage in social activities in bookstores, cafes and theaters nearby. I am glad that I am here. I would definitely recommend Latvia for ERASMUS+.
