

When I found out about our school's *Erasmus+* program, I started researching contracted schools, and Latvia ranked first in my research. While researching Latvia, I was really impressed by its wonderful nature. The fact that Latvia is cheaper than other European countries is also a good thing for a student. These reasons influenced me to come to Latvia, but it's not only that.

While I was doing research for our school, College of Law, many of the courses I took in Turkey matched. This was very important. At the same time, after studying in crowded classrooms in Turkey, it is really great to study with fewer students here. It is necessary to mention Intra Luce, who is our coordinator at the College of Law and has been helping with all the issues since the beginning of the exchange process. We didn't know how the exchange process worked since we went abroad for the first time. However, Intra was very helpful in all the problems we faced and all the issues we had. She really is a coordinator that every Erasmus student should have. Since we arrived at the College of Law, our school has organized meetings for us with not only the leading lawyers in Latvia, but also foreign ones. We are very lucky to have had this opportunity and to have met with such an important lawyers. The education I have received here and the experiences I have gained have shown me how I should continue my professional life in the future.
