

I'm studying at College of Law this Year. I've been in Latvia for almost 2 months and I am staying in Riga. I like this place very much. This is my first time residing in Riga. It is a very small but modern city compared to Turkey. You can find whatever you want here. The only downside is that it's very cold. I'm trying to get used to this it, because my hometown is way warmer – it's at least 10 degrees in winter there. Other than that everything is great. I will stay here until June. I don't think I will be bored, because this city has got me excited!

I love my teachers in college, because they help us a lot. I think these 10 months are very important for my business future. I know that I can improve myself thanks to my school.
